

Route ROUTE-1558

Route manifest didnt update PAJ status to Success/Fail when force update via admin manifest endpoint

Details

Type:	Bug	Status:	BACKLOG (View Workflow)
Priority:	Minor	Resolution:	Unresolved
Affects Version/s:	None	Fix Version/s:	None
Component/s:	Core		
Labels:	core-scrum		
Epic Link:	FY 24/25 Spike/Issues/Bugs rising from support/qa		
Story Points:	3		
GAIA:	QA		
GAIA Build APKs:	No		
QA Estimate:	2		

Description

Step to reproduce

1. Given a paj is created & routed
2. And user goes to Route manifest
3. And user force success PAJ
4. Then verify that wp status updated to SUCCESS
5. And verify that PAJ status updated to SUCESS

<https://operatorv2-qa.ninjavaan.co/#/sg/route-manifest/96179216>

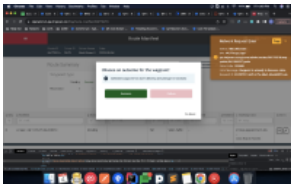

Actual Result:

PAJ status remains in ROUTED

paj id = 64220

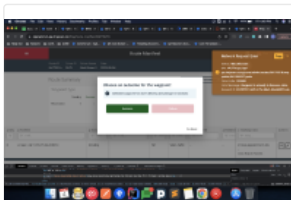

<https://operatorv2-qa.ninjavaan.co/#/sg/pickup-appointment>

wp status already SUCCESS

After reading the code, its because admin manifest endpoint on Core does not update pa job status.

Asking [Mark Jeremiah Robert](#) if we can limit update of reservations/pa jobs only in pickup jobs and not do it via admin manifest.
Currently pickup jobs can handle this scenario properly.

This ticket may change accordingly to updates from ops dept heads.
